

# Knowledge Machine

a machine whose job involves handling or using information

build once, serve billions of users

no Google Healthcare or Google Cancer, etc... search engine

translation autocorrect autocomplete conversations automated speech summarization

general solutions perfect for...

GPT-3 MT-NLG BERT DEEPMIND OPENAI etc...

consultants, integrators, etc. but you start with mega-system, it's expensive and in cloud

## Client-specific User Interfaces

- Smart Speaker
- In-system Interaction
- Chatbot
- Expertise Finder
- Personal Assistant
- Feature Engineering
- Automatic Summaries
- Records Analysis

Help citizens navigate government services	Employees find experts & answers faster	Connect users & share information	Summarize research & share with academics	Drive better clinical decision support	Build and guide financial literacy	Online customer service chatbot	Social media content moderation	Contracts & Regulations
